

NETWORK SERVICES

We can manage. You will prosper.

In the information age, your business can only move as fast as the infrastructure its built on.

At ASU our passion is Computer Networks, it is what we do, and it is what we feel is the most critical function of any organization. It is this same mentality that our clients appreciate most.

We will help you identify and implement technology solutions that reduce costs as well as improve performance, taking advantage of the latest technologies. Allowing your company to run faster.

From time to time, organizations can find themselves without sufficient resources to maintain the highest levels of network performance. Would you find it useful to have additional technical support that has prior knowledge of your network and the way you operate?

ASU can provide you with exactly that.

- Routers
- Firewalls
- Mail Servers
- Backup Systems
- Application Servers
- Internet Services

ASU offers several service options making it both convenient and cost effective to get the IT help you need. These include Retainers, Daily Support Services, Packages, and Pre-Paid Service Contracts.
